ALICE BROCCA

UI/UX Designer

alicejbrocca@gmail.com
Portfolio // LinkedIn

SUMMARY

UI/UX designer with 4.5 years experience designing in the Fintech and Merchant Services industries, specifically the POS industry. Currently leading design and user experience for digital products on Shift4's Value Added Services team, and broader web accessibility (WCAG, AODA) initiatives. Skilled in Figma, responsive design, design systems and AI-assisted prototyping, with basic knowledge of HTML and CSS.

EXPERIENCE

Lead UI/UX Designer, Value Added Services

Shift4 // 06 2023 – Present

- Lead designer for merchant-facing financial products, including Shift4 Capital and Invoicing, with responsive layouts for desktop, tablet and mobile.
- Design experiences across Shift4's point-of-sale (POS) technologies, adapting interfaces to each device and merchant workflow.
- Lead accessibility optimization across the company's products, conducting accessibility audits of key product pages against WCAG and AODA visual and UX guidelines and recommending remediation.
- Built a Figma plugin that checks finished designs for AODA compliance before handoff to development, catching accessibility issues before they reach production.
- Designed and ran workshops on AODA guidelines to build accessibility knowledge across the design team.
- Use AI tools daily for efficiency, notably Claude Design to build working prototypes that validate solutions with the team before resources are invested in final Figma designs.
- Partner with product, engineering, and business stakeholders to translate requirements into responsive, merchant-first, developer-ready designs.
- Before Shift4 acquired Givex in November 2024, worked on several projects including Givex AI, an AI-powered tool that helped support staff assist merchants more effectively; a gift card feature for our Online Ordering product; and a redesign of the menu positioning template.

Junior Product Designer

Produktiv // 05 2022 – 06 2023

- Designed wireframes and prototypes around customer needs, solving usability, findability and accessibility problems.

- Supported the full UX process: discovery, wireframing, prototyping, design systems, iteration and usability testing.
- Communicated design decisions and prototypes to developers through Figma designs.
- Worked on several projects, including the Journey Builder tool for marketers, dashboard for Prospr by Sun Life, and an application wizard for Lazr Freight.

Freelance Graphic Designer

Self-Employed // 2019 – Present

- Partner directly with clients across publishing, healthcare, marketing and environmental design, translating each brief into brand identities, illustration, print collateral and large-scale murals that fit the client's audience and goals.
- Run each project end to end, from discovery and concept development through presentation, revisions and final files, managing scope, client communication and deadlines independently.

EDUCATION

Honours Bachelor of Brand Design

George Brown College, School of Design

CERTIFICATION

TCPS 2: CORE Certification

Research Ethics // 06 2021

TECHNICAL SKILLS

Design & Prototyping

Figma (including plugin development), Claude Design, Claude Code, Responsive Design

Web

HTML (basic), CSS (basic), WCAG 2.2, AODA

Adobe Creative Suite

InDesign, Illustrator, Photoshop, After Effects
